AIM:

1. To develop an android app that caters to every need related to mess.
2. To provide remote access to students to enjoy mess service.
3. To ease management of mess committee.
4. To provide a online payment option for food items, which are charged seperately (e.g. Chicken, egg ,etc.).

OUTLINE OF THE APP:

1. It will automatically sign up all the students, staff, instructors etc. using their email id generated by college IT department.
2. After sign in, login page will be displayed for each entry to the app.
3. Login page will contain login id and password text fields.
4. On successful login, the person would get access to all the facilities provided by mess .

The services to be included are :

- Menu
- Special dish for day
- Announcements and requests
- Feedback
- Contact details of mess committee
- Online payment option for chargeable items.
- Medically unwell, on the door delivery
- Reward points based on correct utilisation of the app (with a fixed monthly reward point) . These reward points could be used to pay for chargeable items.
- Services related to Birthday celebration, like providing utensils, cake preservation etc.
